

The All-New i30

Fastback

N. Born in Namyang. Honed at Nürburgring.

The All-New i30 Fastback N is the sophisticated follow-up to the extremely successful i30 N five-door – and the exhilarating expansion of the Hyundai N high performance range.

N stands for Namyang, home of our global R&D centre. Born in Namyang and honed at the Nürburgring – the N logo also symbolises a racetrack's chicane curve. Created to deliver an absolutely exhilarating driving experience, the i30 Fastback N has also been designed with a level of elegance that will touch your sense for the good things in life.

Elegant adrenaline.

With its sloping silhouette and gracefully raked roofline, the i30 Fastback N is an elegant beauty. It has also been meticulously engineered for maximum driving fun on the road. Balancing racetrack driving dynamics and raw power with the possibility of comfort-oriented daily commuting, the i30 Fastback N is truly a sports car for every day. Confident and perfectly proportioned, this stylish 5-door hot coupe delivers its adrenaline kick with pure elegance.

Shaped to stand out.

In the rear, the sophisticated lines of the sloping fastback roofline flow gracefully into the generously arched rear spoiler with its distinctive glossy black accent. Inspired by a drop of water, the C-pillar treatment and rear windscreen are designed with soft, elegant shapes that reinforce the car's tapered belt line. The sculpted rear bumper also features a reflective character line that arches above the chromed double muffler exhaust system for a sporty, muscular look.

The eye-catching triangular LED fog lamp is a dedicated design element of Hyundai's high-performance N range.

The rear spoiler and LED combination lamps harmonise perfectly with the sculpted side character line, highlighting the distinctive look in the rear.

Powerfully sophisticated.

Heads will turn – and not just because of the sound. The i30 Fastback N's sporty design elements and lowered body reflect its performance credentials. In the front, the aggressive bumper with large air intakes and a unique Cascading Grille with the N badge make a powerful statement. The i30 Fastback N also features exclusive 18" or 19" wheels embossed with the N logo and high-performance brakes with red N calipers.

The i30 Fastback N features LED headlamps and daytime running lights for excellent visibility and striking looks. The aggressively large air intakes have been designed to enhance brake cooling and aerodynamics.

Ta

tailored to your **wild side.**

The i30 Fastback N is styled to stand out – and deliver pure unadulterated driving thrills. It performs as beautifully as it looks. A sophisticated modern design classic, its sloping fastback roofline and gracefully raked lines will have heads turning. And its performance gives you the power to get your tyres smoking – should your wild side need a bit of exercise.

The pleasure of power.

The blistering performance of the i30 Fastback N is driven by a highly responsive 2.0 L direct injection turbo engine providing up to 275 HP. Featuring an overboost function that temporarily increases torque to 378 Nm, the i30 Fastback N is equipped with front-wheel drive and a six-speed manual transmission with a carbon synchronizer ring and a strong clutch. The power of the engine is transferred directly to the gear train in order to always be ready for shifting without any torque interruption. Short shift travel helps with fast shifting and gives you sporty response for more racecar feeling in everyday life.

The 2.0 Direct Injection Turbo engine delivers a choice of 250 HP in the Standard Package, or 275 HP in the Performance Package. Both variants generate a maximum torque of 353 Nm.

The pure joy of performance.

The i30 Fastback N is as hungry for corners as you are – equipped with an impressive array of high-performance components that provide world-class cornering ability. Like the direct and highly precise rack-mounted motor-driven power steering. Or the N Corner Carving Differential, which has been specifically designed and engineered by Hyundai to provide a unique carving feel through even the most challenging bends. It enhances your grip, delivering maximum power to the road while increasing driving fun and maximum speed cornering in the curves.

The 19" Pirelli P-Zero high-performance Hyundai N tyres sport the "HN" initials to indicate that they have been specially developed to match the chassis characteristics of the N range.

Equipped to excel.

The i30 Fastback N comes equipped to perform at a track day with a wide range of racetrack features for enhanced performance. Tested in extreme temperatures and extreme locations, there's no need to upgrade anything. On the track, you're supported by technologies that boost the fun factor. Launch Control helps to launch the car from standstill as easy as possible by controlling the engine torque. The Rev Matching feature automatically increases the revs on the engine when shifting so you can enjoy smoother and faster downshifts. The Overboost improves acceleration performance for a short time – perfect for getting past a difficult competitor.

The N instrument cluster is customised for passionate drivers. You can monitor engine oil temperature, torque, and turbo boost at a glance. It features a shift timing to support track driving. The red zone of the variable LED rev-counter changes according to engine temperature.

Performance cockpit.

The i30 Fastback N cockpit is as much about control as it is about comfort. The ergonomics are completely driver-focused – you have everything in view and at your fingertips. And to help you monitor your driving performance, the High Performance Driving Data function allows you to display track data on the optimally positioned floating touch screen. Featured driving data includes: HP, torque, turbo boost and G-force as well as a lap and acceleration timer.

Created for and by people who truly love cars, the sleek and sporty interior embraces and excites.

N Grin Control System.

Enjoy more smiles per kilometre – At the push of a button, the N Grin Control System gives you the choice of five distinct drive modes to match your mood. The different modes change the character of the car, adjusting the parameters of the engine, the dampers of the Electronically Controlled Suspension, Electronic Stability Control (ESC), N Corner Carving System, engine sound, steering and Rev Matching.

The N steering wheel puts all the driving performance features right at your fingertips. Choose your drive mode or activate rev matching for more fun at the push of a button. Hit the N Button for maximum performance.

Heading to work or driving on your favourite curvy back road? Depending on your mood and the road conditions, you can choose between 5 drive modes: Eco, Normal, Sport, N and N Custom.

Customise your smiles.

In the N Custom mode, you can create your own custom setup by selecting the powertrain and chassis settings for each high-performance component. You can program: Engine Response, Rev Matching, N Corner Carving System, Exhaust Sound, Electronic Controlled Suspension, Steering and Electronic Stability Control.

The thrill of control.

Inside the i30 Fastback N, everything you need to adjust the power and comfort level is right at your fingertips. From the sound of the exhaust to the stiffness of the suspension, you can select it all – at the push of a button.

Sport meets comfort.

Welcome to a whole new level of sportiness. Sit down in the i30 Fastback N's racing inspired cockpit and you'll feel its motor sport roots instantly. The uniquely designed high-performance N sport seats keep you in control and comfortable, with power lumbar support and extendable seat cushions. They feature the N logo and red contrast stitching and are available in a suede and leather combination or full cloth. The sporty character of the interior is further strengthened by the high-quality materials, red air vent rings and dark metal inserts that can be found throughout.

Perfect for enthusiast drivers who love to operate a crisp shifter and a tight clutch, the ball-type gearshift also features a red stripe and the N-badge.

Stay connected.

The i30 Fastback N provides you with the seamless connectivity you expect and innovative tech that makes life easier. Like an 8" touch screen display that makes everything easily accessible with Apple CarPlay™ and Android Auto™. The navigation system includes Live Services and there's even a centrally located wireless charging pad for easy, cable-free smartphone charging.
